FT 6-77
December 1977

U.S. TOBACCO EXPORTS TOP \$1 BILLION IN FISCAL 1977

U.S. unmanufactured tobacco exports for the fiscal year ending September 1977 totaled 289,714 tons valued at a record \$1,065 million. Volume was 9 percent above that of the same period a year earlier and reached the highest level since the October-September period that ended in 1974. Nearly 26 percent of fiscal 1977 shipments moved during the fourth quarter as compared with only 18 percent a year earlier. The heavier shipments during the last 3 months of the year—apparently triggered by anticipation of a dockworker's strike—were responsible for the increased trade in the fiscal year. Given normal conditions, exports would likely have been down slightly from the 266,571 tons shipped a year earlier.

The unit value of leaf exports rose almost 8 percent to \$3.68 per kilogram. This, combined with the larger volume, boosted the total value to a record \$1,065 million. This was up 17 percent from a year earlier and 77 percent above the 1970-74 average.

The value of U.S. exports of tobacco products jumped 28 percent in FY 1977 to \$641 million. Cigarette exports at \$613 million accounted for 96 percent of the value of manufactured tobacco exports. Cigarette exports contained approximately 50,000 tons of U.S. leaf tobacco plus about 12,000 tons of imported foreign leaf.

Leaf Exports by Type

Flue-cured tobacco shipments were up 5 percent in quantity and 13 percent in value during fiscal 1977. Fourth-quarter shipments accounted for almost one-fourth of the total compared with less than one-fifth in the last quarter of the October-September 1976 year. Exports to the three major flue-cured markets—the United Kingdom, Japan, and West Germany—accounted for only 42 percent of total shipments in 1977, down from 52 percent in the 12-month period that ended September 1976. The gain in total shipments came as many smaller markets accelerated their takings. Notably, Denmark, Italy, Thailand, the Republic of China, and Egypt increased their aggregate purchases by a total of 56 percent when compared to October-September

1976. Typical of stronger demand in many smaller markets, Ecuador and Zaire increased imports three-and nine-fold, respectively.

Burley exports, which during the first three quarters of fiscal 1977, were 2 percent behind shipments of a year earlier, ended the year 21 percent above those of October-September 1976, as fourth-quarter shipments soared 135 percent. Most major markets took more burley leaf in the fiscal year just ended, with West Germany and Switzerland setting the pace with respective gains of 3,000 and 2,000 tons and Italy and Japan each with 1,000 ton increases.

Exports of **Stems and Scrap** rose 5 percent over those of October-September 1976 as larger shipments to Denmark, West Germany, Egypt, and several smaller markets more than offset the substantial drop in shipments to the United Kingdom and Japan. Much of the increase was in stems accompanying the increased movements of stemmed flue-cured and burley leaf. The portion of flue-cured exports that moved as stemmed leaf dropped slightly to 66 percent of the total compared with 67 percent last year. However, the portion of burley that moved as strips increased to 52 percent. Larger quantities of unstemmed flue-cured leaf came in the last quarter as shippers rushed to move as much tobacco as possible prior to the strike. The long-term trend in flue-cured exports has also been toward stripped leaf and no reversal of this trend is seen at this time.

Among **Other Types** the export pattern was mixed. Exports of Maryland, fire-cured, sun-cured, and wrapper were up, those of other types were down. Kentucky-Tennessee fire-cured shipments jumped 28 percent as the Netherlands—which accounts for 60 percent of the U.S. market for this type—took 35 percent more than in 1976. Exports of Virginia fire-and sun-cured soared 88 percent. Combined shipments to the European Community and Switzerland jumped from 261 tons in 1976 to 1,429 in 1977 and accounted for 55 percent of the total shipments of this type. Maryland sales to Switzerland pulled the total up 29 percent for the year. Larger wrapper movements to the Dominican Republic and the Netherlands accounted for most of the 22 percent increase in this category.

U.S. tobacco exports are expected to be down by 10 percent or more in fiscal 1978 compared to the relatively high level of the past year. Leaf tobacco exports were depressed in October and November during the longshoremen's strike. Almost all tobacco moves through east coast ports and a significant part of the exports are containerized. A portion of the leaf that moved during the last quarter of fiscal 1977 would normally have moved in the first quarter of fiscal 1978. The distorted trade patterns caused by the recent strike are partially responsible for the pessimistic 1978 outlook; however, the primary reason is foreign buyer resistance to the higher prices and lower quality of the 1977 flue-cured crop. Exports in 1978 will be affected by reduced purchases from the 1977 crop.

The size of the U.S. flue-cured crop currently being sold is 15 percent below that of 1976 and is reported to be significantly lower in quality. The drop in output resulted from a 12-percent quota reduction combined with a severe drought during the growing season. Supplies of upper stalk leaf grades, normally desired by exporters, were disproportionately smaller than the total crop. Reduced supplies of the export qualities and resulting higher prices caused many foreign buyers to sharply curtail purchases.

Japan, the largest leaf customer in fiscal 1977, is expected to reduce shipments in the current fiscal year by an estimated 5 percent, reportedly as a result of poor quality and higher prices. West German buyers cite higher prices, a shortage of desirable grades and a slump in domestic cigarette sales as reasons for a projected 10-15 percent decline in purchases in fiscal 1978. The high prices and lower quality were reasons quoted by most major buyers who were unanimous in projecting lower shipments in fiscal 1978.

Tobacco Product Exports

Cigarettes continued to dominate the manufactured tobacco product exports, accounting for 96 percent of the total value. Shipments totaled 68.3 billion pieces valued at \$614 million, up 16 and 29 percent respectively compared to year-earlier levels.

Belgium-Luxembourg, the largest export destination for U.S. cigarettes, took 13.5 billion pieces valued at \$125 million. This is up 27 percent in volume and 48 percent in value and account for one-third of the total increase in cigarette shipments. Many of the cigarettes entering Belgium-Luxembourg are transshipped to other European countries.

Iran replaced Hong Kong as the no. 2 market, as exports to Iran more than doubled to 9.4 billion pieces. Shipments to Hong Kong rose 5 percent to 5.9 billion. The pattern among other major buyers was mixed.

Cigarette exports are expected to increase in the year ahead. Rising incomes, the growing popularity of the American-blend cigarette and the United States' apparent

comparative cost advantage in cigarette manufacture all contribute to the optimistic outlook. Exports of 75 billion pieces valued at nearly \$680 million would be in line with current indications.

Bulk Smoking tobacco shipments were off 7 percent in volume but rose 6 percent in value. The drop in volume came despite a 152 percent increase in exports to Iran from 1,264 to 3,187 tons. Most other markets took less.

All other products increased both in volume and value. Cigar and cheroot exports were up 23 percent in volume as the EC and the Netherlands Antilles together, took an additional 26 million pieces.

Unmanufactured Tobacco Imports

Duty-paid imports of unmanufactured tobacco were off slightly in volume but soared 21 percent in value. Cigar wrapper and scrap tobacco imports climbed 7 and 18 percent, respectively, but imports of all other categories were lower. Cigarette leaf imports other than flue-cured and burley were down 3 percent as manufacturers resisted the 32 percent higher, average unit import price. With clearances from most suppliers down, flue-cured and burley cigarette leaf imports dropped 30 percent during the past year. Scrap imports from Brazil—the largest supplier in this category, supplying more than one-fifth of the total—increased 51 percent to 10,135 tons. South Korea moved into second place as a supplier as the Philippines dropped from second to third. Much of the tobacco entering under this category is flue-cured and burley threshed leaf. The average value of this leaf rose 19 percent during 1977 to \$1.55 per kilogram.

Actual arrivals of leaf tobacco (general imports) followed the same trend as duty-paid leaf imports, dropping 5 percent in volume. Import value, reversing the trend of recent years, fell 14 percent. The average unit value fell 10 percent from \$2.48 per kilogram to \$2.24. Oriental leaf dropped 5 percent from \$3.34 to \$3.17 per kilogram and cigar leaf fell 10 percent from \$2.27 to \$2.06 per kilogram. The lower oriental price resulted from a critical oversupply situation that has developed in recent years. The cigar leaf price slump is likely the result of lower demand.

Stocks of foreign-grown leaf dropped 7 percent from the record level of a year earlier primarily as the result of a 14 percent decline in oriental leaf supplies.

Import Outlook

Imports during fiscal 1978 are expected to at least maintain the 1977 level. Prices for oriental tobacco (the main import type) are weakening and the short supply high price situation for this year's domestic flue-cured crop could cause manufacturers to turn to foreign sources for larger quantities of filler grades. In general, however, U.S. tobacco consumption is stable and stocks are adequate. Total imports, therefore, may change little in the current year.
